

3 Ways to Implement Progress Learning and Support House Bill 7004

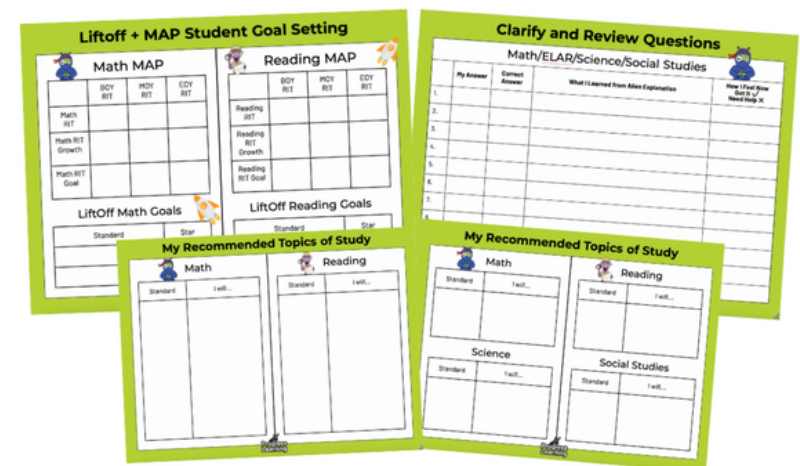

Progress Learning supports HB 7004 by providing educators with effective instructional material for after-school learning mini-camps, learning loss bridge camps, and summer learning camps. Our standards-aligned solution allows students the option to drop down a grade level to recover TN standards not mastered on TNReady or other benchmark assessments from the previous year. Liftoff supports in recovering larger skill gaps in vertical alignment that have occurred over multiple academic years, which will ultimately help students remediate learning loss.

1

On Grade Level

- Use Progress Learning to review and supplement practice on the TN standards you are teaching throughout the school year. Teachers can utilize the [Session Activity Report](#) to track mastery of standards for HB 7004.
- Assign assignments or direct students to click on the TN standard in their "Study Plan" as a piece of their independent practice.
- Utilize the student data trackers & our student goal setting [English templates](#) and [Spanish templates](#) to help students take ownership of their learning.

Subject	Standard	Type	Date	Time Spent	Total Questions Attempted	Total Questions Correct

2

Add Additional Subjects

- Teach the students you are working with for HB 7004 how to access additional subject practice within their Study Plan in Progress Learning to practice the standards they still need help with.
- Each student can use the "Study Plan" to learn and practice the TN standards from the previous grade level that they did not master on the TNReady test.
- Utilize the [student session activities](#) with last year's standards to help students take ownership of their learning.

3

Recommended for 2-8

- Use Lifftoff during intervention time to help identify each student's foundational skill gaps.
- Lifftoff will identify skill gaps all the way down to K-1, not just the foundational skills they are missing from last year.
- Lifftoff is a support to help fix the root of the problem.
- NWEA MAP only integrates with Lifftoff.
