

5 Ways to Prepare Instruction for Summer Learning

How Progress Learning Makes Summer Lesson Planning Easy

Liftoff

Personalized Instruction

Add Additional Subjects

Create Custom Assignments

Create Custom Tests

Liftoff Adaptive Intervention

Students take diagnostic tests within the program and are provided with an individualized learning plan called My Galaxies. My Galaxies supports students in math and reading to begin working on foundational standards and skills that students have not mastered in vertical alignment. Liftoff helps recover all learning gaps for elementary and middle school students (grades 2–8).

Personalized Instruction

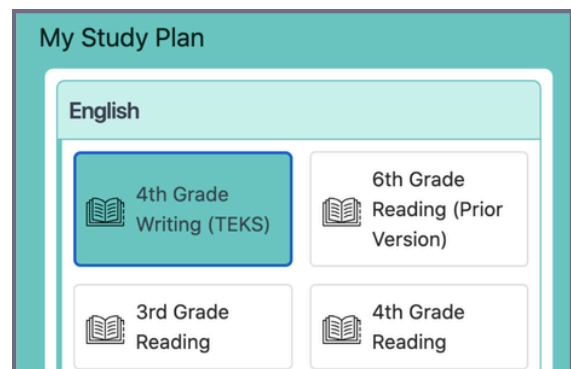

Progress Learning reinforces state standards with a variety of personalized assignments and assessments. Students can practice standards in their Study Plan to target which specific standards they need to focus on and improve mastery.

Add Additional Subjects

Teachers can add additional subjects to the class where the student is enrolled. This will apply the additional grade-level subject to all students in the class. If the teacher does not want to add an additional grade-level subject to all students in a class, then a separate class can be set up for a small group of students where the subject areas need to be added.

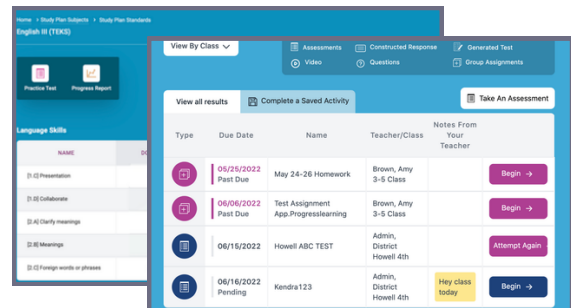

Students can work towards mastering their previous grade-level standards.

Create Custom Assignments & Tests

Teachers can create custom tests and assignments in the assignment center and differentiate practice to individual students that need reinforcement on specific state standards.

Teachers can then download reports to track mastery of the standards to further differentiate instruction.
