

# What Our Customers Are Saying

For over 25 years, we've helped teachers craft impactful standards-aligned instruction that meets the needs of every learner. But don't just take our word for it. Hear what our customers have to say!

Standards-aligned, great activities, rigorous, explanations for correct and incorrect responses, literally begged the district to get it back when we lost it for a bit.

I love the Bell Ringer questions that can be easily displayed and are standards-aligned.

I like that there is an assignment bank that allows teachers to create assignments and that I'm able to track my students' progress.

Differentiation, video lessons, bell ringers, the ability for students to redo the assignments without teachers having to edit or repost the assignment.

The language and activities used allow the learners to use the language that they will have to apply their academic skills in.

I love the easy-to-read, easy-to-use data reports in Progress Learning.

**User-friendly, sleek modern design, high degree of customization, and a solid bank of questions.**

This program is fairly easy to use and gives much-needed support in helping students achieve academic goals.

Good for collecting student data.

**Students are very interested in doing math. Grades are improving and they are also competing with each other. Math is now fun for them.**

This platform offers advantages for students and teachers. The many options when creating assignments help teachers with differentiated learning in large classroom settings. It's user friendly for both students and teachers and shows instant grades and practice assessments for students who need extra support. I would recommend this to any school, teacher, or student.

This platform provides teachers with the ability to assign individualized practice and support.

The best platform for rigorous, trackable material and data. THE BEST!

I like the questions. They are guiding and rigorous and provide our students an excellent source to help them understand and master standards.
